

Tuesday, October 30 | 3:00 - 6:00 p.m.
Tonawanda Castle, 69 Delaware Street, Tonawanda, NY 14150

The future of freight movement is a moving target, with new technologies, processes and policies creating both opportunities and challenges. As shippers and their logistics providers plan for the future, these changes must be taken into consideration, but advancements designed to lower cost and speed-to-market are coming at a faster pace than ever before.

Governmental agencies that serve the freight community are making advancements of their own. In fact, here in our bi-national region, the “Border of the Future” can more accurately be described as the border of the here-and-now, as technologies that only recently were considered to be somewhere down the road are already being implemented, and serving Buffalo Niagara’s freight needs.

On October 30, join ITGO, U.S. Customs and Border Protection (CBP) and Canada Border Services Agency (CBSA) at the beautiful Tonawanda Castle for the premiere logistics event of the year, and an in-depth look at the technologies that are being implemented right now - and in the near future - to make our border safer and smarter, supporting the free flow of freight in the Buffalo Niagara region.

After the presentations, stay for a panel Q&A with our speakers, followed by networking with logistics, manufacturing and economic development colleagues.
